

assembling kitchen : kitchen of the future

Quality  
Cuisine

## Convenience Assembling

Kitchen of the Future is based on the know-how of qualified partners and industrial manufactures and by centralizing equipment, marketing and sales synergies will lead to high result.

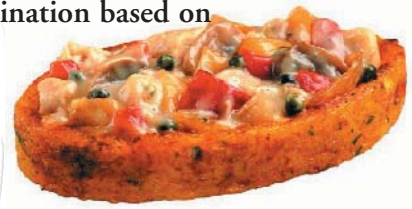

production features

Quality Cuisine

The convenience kitchen is developed by Quality Cuisine in combination based on Unique Selling Points:

- Rice boats
- Potato boats
- Meal Components

*Rice boats*

The kitchens will be situated at the capitals of countries where the majority of inhabitants are located, based on economical best situation close to the consumers:

Customers profile:

- airline passengers
- retail customers
- hotels and restaurants
- petrol stations
- institutional consumers
- wellness parks

*Meal components*

One of the important issue of assembling kitchens is saving costs at packaging and automation.

Part of equipment:

- foil wrapping machines for single packs
- wrapping machines, carton machines for retail- and meal-boxes of all kinds
- carton machines for bulk packaging

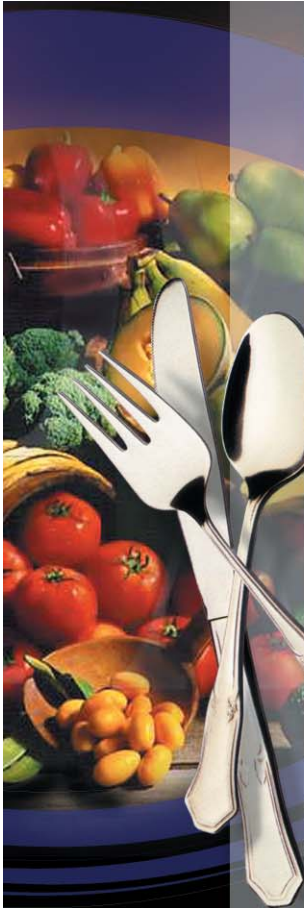

the advantage for partners happens by:

- cost concentrations of packaging processing and assembling
- logistic
- marketing
- sales affairs
- development
- partners know-how
